Different Types of SQL JOINs

Here are the different types of the JOINs in SQL:

- (INNER) JOIN: Returns records that have matching values in both tables
- LEFT (OUTER) JOIN: Returns all records from the left table, and the matched records from the right table
- RIGHT (OUTER) JOIN: Returns all records from the right table, and the matched records from the left table
- FULL (OUTER) JOIN: Returns all records when there is a match in either left or right table

INNER JOIN

SELECT *

INNER JOIN tbl bolum proje kontrol

ON tbl Employee.bolum dep id=tbl bolum proje kontrol.bid

SELECT tbl_Employee.Name,tbl_Employee.LastName, tbl_Employee.bolum_dep_id, tbl_bolum_proje_kontrol.bid,tbl_bolum_proje_kontrol.info,tbl_bolum_proje_kontrol.StartDate FROM tbl_Employee

INNER JOIN tbl_bolum_proje_kontrol
